

Carolina Vilar Ródenas

Viladecans, Barcelona | carolvr8@gmail.com

[Linkedin](#) | [GitHub](#) | [Portfolio](#)

Full-Stack Developer with a degree in Web Application Development (DAW), hands-on experience in frontend and backend development, REST APIs, and modern web applications. I combine technical skills with analytical thinking rooted in a Philosophy background to build scalable and maintainable solutions. Looking for my first professional contract to keep growing in a collaborative environment.

FEATURED PROJECTS

DevConnect — Social Platform for Developers — Final DAW Project

Dec 2025-May 2026

[GitHub repo](#) / [Demo online](#)

- Built a social network for developers featuring posts, comments, likes, user profiles, and a gamification system with achievements and progression.
- **Frontend SPA built with Angular and RxJS**, using async programming, REST API consumption, and reactive UI updates for authentication, posts, and user interaction.
- **Backend built with Laravel**, implementing secure authentication and session management via Laravel Sanctum and HTTP-only secure cookies.
- Collaborative development with Git/GitHub following a team-based workflow.

JavaFx Fish Simulation — Interactive Fish Simulation

Jun 2025-Aug 2025

[GitHub repo](#) / [Desktop demo](#)

- **Simulation built with JavaFX**, using an Entity Component System (ECS) architecture and prior use of the Strategy pattern with dependency injection.
- Includes procedural entity generation with random color and size variation, movement physics and collisions, and original custom graphics.
- **Integrated the Australian National University quantum API (QRNG)** to replace Java pseudorandomness with true quantum randomness.

EDUCATION

Higher Technician in Web Application Development (DAW)

Average grade: Distinction (9/10)

Institut FOC, Spain

2024- 2026

Bachelor's Degree in Philosophy

WORK EXPERIENCE

Full-Stack Developer Intern — Sinqro

Viladecans, Spain

Febr 2026-May 2026

- Developed a multi-tenant SaaS platform for the restaurant industry during my vocational training internship. Includes per-client storefront, online ordering, and SSR rendering with Next.js.
- Implemented per-tenant configuration (domain, branding, themes, SEO, and multilingual support), REST API development and consumption for catalogue, checkout, order tracking, and payments, and optimisation of the shopping experience in multi-tenant environments.
- **Stack:** Next.js, React, Fastify, REST APIs, Stripe, Tailwind CSS, Git/GitHub, Postman, and AI tools.
